SUMMARY

Motivated Software Development Engineer (Fresher) with a strong academic background in Statistics and Data Science and hands-on exposure to programming, data analysis, and machine learning concepts. Strong foundation in Python, C/C++, and core Computer Science principles. Familiar with databases and the software development life cycle (SDLC). Possesses strong problem-solving, logical thinking, debugging abilities, adaptability, and effective communication skills, with a quick learning mindset.

EDUCATION

Master of Science in Data Science

Bishop Heber College | Expected Graduation-2026

CGPA: 8.7

Bachelor of Science in Statistics

National College | 2021-2026

CGPA: 8.4

Higher Secondary (XII)

Jegan Matha Matriculation Higher Secondary School | 2020-2021

Secondary School(X)

Jegan Matha Matriculation Higher Secondary School | 2018-2019

INTERNSHIPS

Data Science Intern - CodTech IT Solutions(May 2025)

- Cleaned and analyzed structured/unstructured data using Python, Pandas, and Matplotlib.
- Built predictive models using machine learning algorithms for real-world datasets.
- Created visualizations and interpreted insights to support business decisions.

Machine Learning Intern – Cognifyz Technologies (Dec 2024)

- Designed and optimized ML models using Scikit-learn.
- Performed feature engineering and evaluation on healthcare-related datasets.
- Improved model accuracy through advanced preprocessing techniques

PROJECTS:

Impact of Online Gaming Among College Students

- Analyzed the impact of online gaming on academic performance, mental health, time management, and social behavior using survey datasets, applying data cleaning, preprocessing, and exploratory data analysis (EDA) techniques.
- Collected and preprocessed data, conducted ANOVA & Chi-Square tests, visualized results, and provided solutions to gaming addiction
- Tools: Excel, SPSS, Python

Automated Brain Stroke Prediction using Machine Learning

- Developed a machine learning-based predictive system to identify brain stroke risk using medical and demographic data, performing data cleaning, feature engineering, and exploratory data analysis (EDA) to improve data quality and model performance.
- Implemented and evaluated classification algorithms using Python, Scikit-learn, and statistical techniques, achieving improved prediction accuracy and demonstrating skills in machine learning, model evaluation, problem-solving, and data-driven decision making.

ADDITIONAL INFORMATION

- Technical Skills: Python, R, C++
- Libraries: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, OpenCV, YOLO
- Frameworks: Flask, Streamlit
- Tools: Power BI, VS Code
- Databases: MySQL, MongoDB
- Soft Skills: Problem Solving, Communication, Team Collaboration, Positive Attitude
- Language Proficiency: Tamil, English, Hindi, Marathi, Kannada
- Certifications:
 - Microsoft – Generative AI, Copilot, Data Science, End-to-End Analytics
 - TCS – Communication Skills, Presentation Skills
 - Kaggle - Advanced SQL
 - HP Life – Introduction to Cyber Security Awareness, Data Science and Analytics
